Regarding:

The NV SR 28 Corridor Monitoring Report Related to the East Shore Trailhead Operations and Paid Parking Pilot for 2021

Although the report mentions concern for the "community and visitors" I see no concern for the Incline Village Community at all.

The East Shore Trail parking has overflowed into the Mill Creek district of Incline destroying quality of life of these neighbors.

The East Shore Express service from the Old Elementary School has destroyed the quality of life of neighbors in that area, and negatively affected all residents who traverse that area on Southwood.

We Incline Residents have formed a group to combat TTD's continued activities that propose to advance it's objectives at the expense of the Incline Village Community.

If you truly want to work with the community, it will take more than the 5-member Mobility Hub Committee and HDR's consultant surveys.

Ronda Tycer, PhD
Incline Village Resident
